

The NEW FORCE in Roller Shutters

FORCESHIELD

ROLLER SHUTTERS

Maximum Security

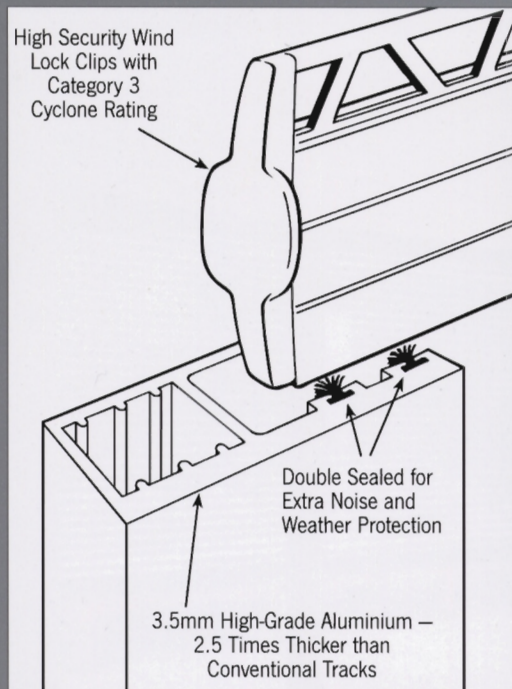

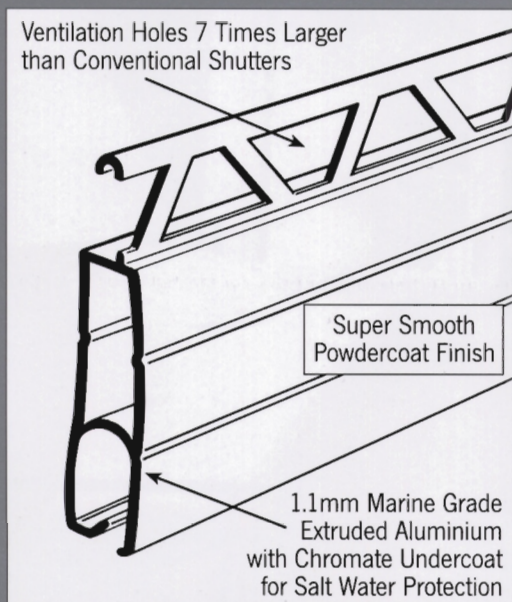

Maximum Ventilation

WHY IS FORCESHIELD SO STRONG AND SECURE?

To provide you with the best possible security for your home and family, Forceshield has the strongest extruded profile & tracks available in Australia. In fact Forceshield shutters comply with Australian Standards to resist Category 3 cyclones.

LARGE VENTILATION HOLES!

The strength of the Forceshield profile allows much larger ventilation holes while still providing maximum security and strength. In the ventilated position your Forceshield shutters provide a massive 7 times more light and air than conventional shutters.

MANY OTHER BENEFITS TOO!

- ✓ **SUMMER** Forceshield Shutters stop up to 90% heat in summer. You control how much heat and glare comes through your windows.
- ✓ **WINTER** Forceshield Shutters keep the cold out and the warmth in by stopping up to 70% heat loss through the glass in winter.
- ✓ **SAVE MONEY** Forceshield Shutters reduce the cost of heating and cooling your home.
- ✓ **NOISE** With an STC rating of 39, noise is reduced by up to 50%. Forceshield Shutters allow you to control the noise from traffic, aircraft, noisy neighbours, barking dogs, lawnmowers, etc.
- ✓ **PEACE OF MIND** Forceshield Shutters form a shield to protect you against undesirable elements, yet they are easy to open for a safe exit.
- ✓ **BUSHFIRES** Intense heat causes windows to explode & the curtains to burst into flames. With Forceshield Shutters this cannot happen because the heat gain through the glass is reduced by 90%.
- ✓ **VERSATILE** Use Forceshield Shutters on all openings such as windows, doors, verandahs, counter tops, in both residential and commercial situations.
- ✓ **ATTRACTIVE FINISH** Forceshield Shutters come in a high gloss, super smooth, maintenance free, DULUX powdercoated finish in a full range of colours.

TECHNICAL DATA

Pelmet Size	Max Shutter Height (incl roll)	Maximum Shutter Width
137 mm	800 mm	5000 mm
150 mm	1150 mm	5000 mm
165 mm	1250 mm	5000 mm
180 mm	1800 mm	4500 mm
205 mm	2300 mm	4500 mm
250 mm	2850 mm	4500 mm
300 mm	3400 mm	4500 mm

Profile material: Extruded High Temper T6060 Marine Grade Aluminium
Shutter Weight: 8.5kg /square metre
